RUSHVILLE FLOODING

At a previous meeting the Surveyor was asked if we had any idea how many parcels in the city of Rushville would be in the watershed of the proposed work to alleviate flooding in the city. The Surveyor worked with the GIS coordinator and reported that there could be as many as 2,100 +/- parcels in the city alone. Parcels in the county would be added to this number as well.

With nothing else to come before the Board, the meeting was then closed on motion by Jarman, 2nd by Aulbach. Motion carried.
