ADMINISTRATOR'S REPORT

2025

The year 2025 was another year for changes for the Rush County Health Department as this was the second year to utilize Health First Indiana funds. Unfortunately, the Indiana Legislators voted to decrease the Health First Indiana Funds, so the budget was adjusted accordingly. One part-time position was eliminated and the staff adjusted to pick up the workload. The staff continued to provide services in all our departments: Nursing, Environmental, and Vital Records. We began to review the Core Services to improve our programs and add services.

The daily duties of the administrator varied from reviewing issues in each department, schedules, and so on. Reviewing employees' hours and payroll. Answering questions and problem solving. Occasional meetings/phone calls with the Health Officer to update on current situations. The administrator does attend the Commissioner's and County Council meetings to keep our county officials informed of the Health Department's changes.

One upcoming change was working with the Commissioners on moving out of the Courthouse to a different space. I explained to the Commissioners and County Council that the Health Department was not accessible to the public to provide our services. In January, the Commissioners purchased the building known as the Rush County Senior Center. The Commissioners decided that the Health Department and Purdue Extension would move into the building. After plans were developed, reviewed by the architect company, then sent to the State for permits. The Commissioners voted to name this new building: Rush County Annex. With the HFI funds, a digital sign was ordered for the front of the building. This sign would be used to advertise the Health Department services and upcoming events for RCHD, Purdue Extension, and EMA/Preparedness as well as any other county announcements.

A new program that was started in 2025 was the Sharps Container Exchange Program. This was in partnership with Clean Green Rush, who is part of the Solid Waste District, our recycling center. Lisa Carpenter, District Director, contacted me and asked if the Health Department could pass out new Sharps containers. They would provide the containers. The used filled containers could be returned to the Tox-Away Center on the first Saturday of each month and a new Sharps container would be offered. This is an effort to keep harmful used needles and other harmful sharps out of the environment and from spreading possible contagious diseases. This service is free to the public.

Total Sharps containers passed out - 54

Total Used Sharps containers returned - 32

The Health Department has applied for and received the Naloxone grant for several years. Narcan has been offered to law enforcement, Fire Department, County Jail, EMS, Healthcare workers, schools, and Porch of Recovery, an agency who helps anyone with a substance use disorder or mental health. There is one business who has a Narcan box that the Health Department does make sure there is a supply available. Training is offered to anyone who is interested in keeping Narcan on hand for emergencies.

Total doses given out-181

Both the Sharps Container program and Narcan Program are part of the Core Services for Trauma and Injury Prevention and Education.

As the Administrator, I had continued to divide my time between Nursing and Administrative duties. By the fall, the number of homecare patients that I was seeing had decreased and I made the decision to turn over my patients to the other nurses. I have continued to assist with vaccinations, TB testing and so on in the office when needed. My hours were spent in both areas as follows:

Administration hours: 1258.75

Nursing hours: 92

Meetings attended as Administrator:

Commissioner's meetings-20

2025 Annual Report

Over the past year, our nursing team has remained dedicated to serving the needs of our rural community. With a focus on accessibility, relationship-based care, and prevention. We have worked to address challenges while building trust and strengthening connections across the populations we serve. The following nurses are staffed currently at the Rush County Health Department Dixie Meyer RN/Admin, Melissa Smith RN, Mandy Gill LPN, Krista Richey LPN

Home Health Services

Home Health Care Services have provided care to thirty-two of Rush County, such as medication set-up, assessing and monitoring their general condition, giving emotional support to the patient as well as their caregivers. Many of our patients have memory issues and need assistance with medications. Heart disease, diabetes and emotional/mental conditions are major conditions that we help manage. Education is provided as needed. These visits are conducted under each patient's Provider's orders, and any changes are reported as such. Our Home Health Care service has enabled people to remain in their home safely.

Immunizations

Immunization clinics were available for children and adults, insured or uninsured. We were also able to vaccinate in homes, for those who needed that service. The programs used to offer vaccines are VFC, 317, and Vax Care. The (VFC)Vaccine for Children Program offers vaccinations at no cost to the recipient. Immunizations are offered to children on Medicaid, have no insurance, or their insurance does not cover vaccines. The vaccines that are offered to children through the age of eighteen, including the following: diphtheria, tetanus, pertussis, polio, haemophilus influenza B, measles, mumps, rubella, varicella, pneumococcal, meningococcal MCV4 and Men B, HPV, hepatitis A and B, rotavirus, Covid and influenza. IDOH offers the 317 Program for adults with no insurance. The following vaccines were offered: Tdap, Flu, Covid, Prevnar 20, and Pneumovax 23. Vax Care provides all vaccines to children and adults with health insurance. Vax Care will process the insurance claims and RCHD receives compensation for each vaccine given. The nurses did go to different locations to offer Covid, Flu and Pneumonia vaccines such as businesses for their employees, homecare patients and any homebound when notified.

Clinics: 47 VFC: 49 317: 17 Vax Care: 116
Total number attended: 182 Total vaccines given:306

Tuberculosis

The Rush County Health Department has maintained Tuberculosis Control as we have for many years. The Indiana State Department of Health guidelines are followed. All information is reported to IDOH via NBS website as with all communicable disease reporting. The IDOH Regional TB nurse always works closely with our department and is vital in providing our nurses with up-to-date information to handle any Tuberculosis cases properly. In 2025, there were no active cases of Tuberculosis.

Mantoux testing is offered, and any positives are followed up with chest X-rays and further follow-up. Any treatment of Latent TB is ordered through IDOH and education on the medication is done with each latent TB case that decides to take the preventative treatment. In 2025, there were four cases of Latent TB that were offered treatment.

Mantoux testing was done on individuals for multiple different purposes. The following is what testing our department administered and the results:

	Tested	Negative	Positive	Did not return
Employment	40	40	0	0
Miscellaneous (College, Daycare families, Foster care, Rehab, & etc)	5	5	0	0
Follow-up	0	0	0	0
Totals	45	45	0	0

Communicable Disease Investigations

Rush County Health Department investigates communicable disease cases in our county, according to the IDOH Communicable Disease Rule. NBS (NEDSS Based System) is used and vital in tracking communicable disease in the county. The Indiana Department of Health Student Epidemiology Response Team (IU-SEIT) and the Indiana Department of Health Infectious Disease & Prevention Division Epidemiology Field Team had been assisting our county in conducting case investigations. Due to budget cuts, these programs were suspended in 2025. RCHD began to investigate all the cases.

Animal bites and lead are still the most frequent cases investigated. The following information is the Case Status Report from NBS.

<u>Disease/Condition</u>	<u>Confirmed</u>	<u>Not a</u>			<u>Unknown</u>	<u>Total</u>
		<u>Case</u>	<u>Probable</u>	<u>Suspect</u>		
2019 Clinical Novel Coronavirus	1	0	0	0	0	1

Environmental Health

Specialist

Environmental Health Specialist

2025 Report

The Environmental Health Specialist (EHS) has broad responsibilities for the prevention and suppression of conditions, which could threaten the health of the citizens of Rush County. Areas include private sewage disposal, retail and temporary food establishment permits and inspections, food-borne illnesses, mosquito surveillance, well water safety, complaints pertaining to the health and well-being of our citizens as well as public and semi-public swimming pool inspections. Additional responsibilities include being able to answer questions regarding the health departments role within the community as well as a broad range of questions pertaining to many of the aforementioned areas of responsibility within the health department, permitting and inspection of tattoo establishments and tattoo artists as well as oversight on the environmental cleanup of toxins left behind at a methamphetamine manufacturing site.

Private Sewage Disposal Ordinance of Rush County, the policies and procedures are regulated by the Residential On- Site Sewage Systems Rule 410 IAC 6-8.3. The Environmental Health Specialist reviews soil scientist reports, prepares minimum specification sheets for all on-site meetings, holds on-site meetings with installers and homeowners (or the homeowner's agent), checks plan reviews submitted by the installers following the on-site meeting, issues septic permits, and overseen the final installation of the tank sets, soil absorption fields and subsurface drainages. This all applies to new sites, repairs, and hook-up replacements of private septic systems.

In 2025, 25 residential on-site septic applications were submitted to the health department for consideration. Applications covered 22 new residential on-site systems, 1 commercial on-site system, and 2 hook-ups to existing systems. Of these 25, a total of 22 were moved to a finished/complete status. 3 of the 25 will carry over into 2025. There are still 11 systems in different stages from 4.

36 soil reports from registered soil scientists were submitted to the department for review.

There were 7 dye tests performed in 2025, these were done to determine failures, leaks, and to track drains for septic systems.

The Environmental Health Specialist works closely with the Indiana State Department of Health (ISDH) District Field Staff when concerns arise with on-site plan reviews, soil absorption fields (SAF), subsurface drainages, and final inspections.

All food permit holders in Rush County are charged according to Rush County Ordinance #2015-2. Fees for annual food permits and temporary food vendors are outlined in categories of Full Time Food Establishment, Caterer/Mobile Vendor, Mobile Pre-Packaged Frozen Food, Farmers Market Frozen Meat/Vegetables and Cider, First Time Food Permit (last quarter of year) and Temporary Food Permit.

A total of 232 annual food permits were issued in 2023, 102 for profit and 28 not for profit. 102 temporary food permits were issued throughout the year for different food vendors at festivals and the county fair.

Food inspections follow the Indiana State Department of Health Guidelines for Food Safety and the Rush County Ordinance. A combined total of 333 food safety inspections were completed during the year. These food inspections included for profit and non-for-profit food establishments both annual and temporary permitted

The following indicates the top violations for Rush County Retail Food Establishments in no particular order.

Statute Number	Violation Description
301	Sanitizer Testing Kit
215	Food Labeling
213	Hot/Cold holding temps 41-135
353	At least one service sink or 1 curbed cleaning facility shall be provided
447	Mops suspended for drying, to prevent bacteria growth.
443	Cleaning Frequency of the Facility
442	Premise in Good Repair

The CDC has determined that 60% of all food-borne illness can be attributed directly to the personal hygiene and health of the food establishment employee. As a result, the food establishments with extensive employee handling of raw ingredients should be inspected more frequently than those establishments serving pre-packaged or non-potentially hazardous foods.

ISDA District Food Protection Field Staff and ISDH Food Specialist continue to work with the local environmental Health Specialist to ensure proper food inspections.

The EHS oversees public and semi-private swimming pool inspections. There are currently 3 public swimming pools and 1 splash pad in Rush County. Inspections were held at each pool with all pools passing.

In addition, the duties under Indiana's Methamphetamine rule (318 IAC 1-1) with respect to environmental cleanup of toxic waste left behind at a clandestine drug manufacturing site are under the EHS division. In 2025, the department did not receive any Indiana State Police Occurrence Report that indicated Meth Lab had been found in any residence in Rush County.

The EHS investigates all formal written complaints dealing with all environmental and food issues. This year there were a total of 3 written complaints received by the Health Department. All follow-up complaints were made by Rush County EHS.

Tattoo establishments and tattoo artists are to maintain annual permits and be inspected yearly through the health department. The Environmental Health Specialist oversees this operation. There is currently (1) permitted establishment in Rush County.

Dan Burklow continues to attend continuing education courses and classes. Dan has received all required certifications through the State and will continue to attend training seminars and conferences to further his knowledge. Burklow has completed the Lead Risk Assessor and Inspector Courses this year.

Housing complaints and mobile home complaints have increased; The Environmental Department is working diligently to learn and get the education to field these complaints.

The goal of Environmental Health Services and the Environmental Health Specialist is to continue to strengthen commitment by providing our Rush County Citizens with a Health Department Staff dedicated to the well-being of the citizens of Rush County. The EHS as well as the Health Department staff strives to be a valuable resource to Rush County through cooperation and communication with consumers, state and federal agencies as well as the medical and law enforcement community, thus continuously educating and helping to prevent conditions which could threaten the health of the people of Rush County.

EAST CENTRAL INDIANA CHAPTER MEMBER OF THE YEAR

2025

VITAL RECORDS

REPORT

RUSH COUNTY HEALTH DEPARTMENT

VITAL RECORDS REPORT FOR 2025

Beginning with the year 1882, Rush County has recorded, and made available to the public, births, and deaths in Rush County. Although statistics have advanced to electronic records, we continue to maintain the value of manual archives, housed in books convenient for public viewing.

The Law mandates an "Open Book" Policy, the exception being protected information, such as adoptions and communicable diseases.

The year of 2025 brought us four (3) Births, (3) three females and one (0) male. Three Free Birth Certificates were issued, as we waive the cost for the first Birth Certificate received, following a home birth. There were no Stillbirths reported.

Rush County recorded zero (0) Adoptions, zero (0) Amendments to Births and zero (1) Name changes by Court Order.

One hundred and four (104) Deaths were reported for 2025; fifty-four (54) were Males and fifty (50) were Females. This compares to one hundred and twenty-one (121) in 2024. Of those deaths, thirty-two (32) were reported as Coroner Cases, with six (6) being Autopsy Cases.

One free Death Certificate is issued to Veterans who served in the U. S. Armed Forces for Veteran Administration benefits. Twenty (20) were issued in 2025.

Each month a list of people that became deceased within Rush County is provided to the Social Security Administration in Richmond and is also furnished to the Auditor and Clerk of Rush County. The Auditor uses this information to purge names from the exemption list. The Clerk removes these names from their registry of residents.

Vital Statistics requires you to pay a Coroner's Fee for the Coroner's Continuing Education Program each year. That cost is currently \$2.50 per Death Certificate.

In 2019 we started using PayGov.US, this allows us to accept credit card payment by phone or walk-in.

The Staff within our office assists in helping all customers when needed. We strive to help with the needs presented by the Public
